Office Action Summary	Application No. 10/027,625	Applicant(s) STUMVOLL ET AL.	
	Examiner Patrick J. Nolan	Art Unit 1644	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1644

1. Claims 9-21, 23-28 and newly added claim 29 are pending.
2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12-27-05 has been entered.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 9-21, 23-28 and newly added claim 29 are rejected under 35 U.S.C. 102(b) as being anticipated by Duro et al. (ad on the IDS submitted 7-1-02), for reasons of record set forth in te Office Action mailed 2-25-05.

Applicant's arguments filed 12-27-05 have been fully considered but are not found persuasive.

Applicant argues that Duro et al., fails to teach a method for serologically identifying the actual sensitizing allergen source among a variety of possible allergen sources containing cross reactive proteins epitopes, Duro et al., do not anticipate the methods of claims 9, 23, 26 or claims 10-21, 24, 25 or 27-29.

Duro et al., does teach serologically (from serum) identifying the actual sensitizing allergen (recombinant Par j2) from a variety of possible allergen sources, since the patients were Parieta judaica pollen sensitive and since Duro teaches there are nine possible allergens in P. judaica pollen and 82% of the P. judaica pollen sensitive patients serum's IgE reacted with recombinant Par j2.

The claimed invention is anticipated by the prior art teachings.

Art Unit: 1644

It is noted the claimed invention is drawn to identifying the actual sensitizing allergen in claim 9, so claim 10's recitation of "for selection of treatment of a disorder involving extract" adds no patentable weight to the claim since no step is actually performed and since the preamble does not add life to a identification claim.
